GET TO KNOW AGARWOOD

INTEGA
International Gaharu

AGARWOOD is an aromatic resin or resin produced by **KARAS TREES** as a result of fungal/ bacterial attacks on the roots, stems or branches.

Agarwood serves as a protector for the Karas tree.

There are 25 species of Karas trees in Equatorial forests. Among the popular species are: ***Malaccensis, Subintegra, Sinensis, Crassna.***

Known as ***Agarwood, Eaglewood, Aloeswood, Chen Xiang, Jin Koh & Oud.***
